MODULES

REALITY CHECK

How do top performing companies navigate today's uncertainty and build solutions into their strategy? Learn best practice models, tools, and processes to help you to identify these factors.

STRATEGY

The structure and activities of the company should be built around a firm strategy that delivers competitive advantage and resiliency. This module will present best practices for strategy development, while taking uncertainty and constant change into account.

VALUES

Corporate Values should be a source of competitive advantage. We will discuss approaches used by leading organizations to leverage values to achieve this edge.

CULTURE

In the words of Peter Drucker, "Culture eats strategy for breakfast." Learn how culture can be assessed, measured, (re)designed and implemented to drive your organization's competitive advantage and success.

CUSTOMER CENTRIC

Companies that achieve an organizational focus on customer success are shown to be 60% more profitable than others. What do organizations need to do to make customer success a reality, and what are some best practices to get there?

OPERATIONAL EXCELLENCE

Learn best practices from Lean, Six Sigma, and other sources that, if implemented, will enable you to define and achieve operational excellence.

PEOPLE CENTRIC LEADERSHIP AND LEADING FOR CHANGE

Successful business is all about people. Is your organization an employer of choice for lifelong careers? The ability to align and support the workforce is critical to successful transformation and retention of your highly skilled workforce.

EXECUTION

Strategy fails when companies don't accomplish what they wanted to. We will discuss where companies go wrong on the implementation side, and how you can avoid repeating those mistakes.

WORKFORCE 4.0

The best companies will prepare their people for success by addressing critical skills gaps proactively as the business landscape changes. Learn about best-practices for workforce planning in this new industrial era.

INDUSTRY 4.0

Acquiring new technology will not be successful without close alignment to your business strategy. We will present an overview of many of the new technologies companies are adopting today, along with best practices for assessment and implementation.

SUPPLY CHAIN MANAGEMENT

This module provides an overview of emerging trends and best practices to partner with your customers, providing transparency and agility while managing and de-risking their networks.

PROJECT MANAGEMENT

With a new normal of constant change and ever-evolving business pressures, project managers must be quick to adapt, empowered to make decisions aligned to the business strategy, and must be masters of team engagement. Learn how the profession has changed recently to accommodate these new realities.

NEW PRODUCT AND PROCESS DEVELOPMENT AND INTRODUCTION [NPPDI] AND INNOVATION

This module presents fundamentals of NPPDI and how have other companies streamlined their processes to encourage innovation throughout the organization.

CARBON STRATEGIES

With customer demand for ESG reporting increasing, companies must act quickly to develop strategies. This module provides an overview of the fundamentals of decarbonization including an introduction to the associated principals and terminology.

CIRCULAR MANUFACTURING

Manufacturers can vastly improve their environmental stewardship by implementing circular manufacturing strategies. This module provides an overview of the circular economy and describes how manufacturers are starting to incorporate principals of circularity into their operations.
